

Musa's Module 3 Task Solution

Module 3 Task: Operation Overcast - Phase II

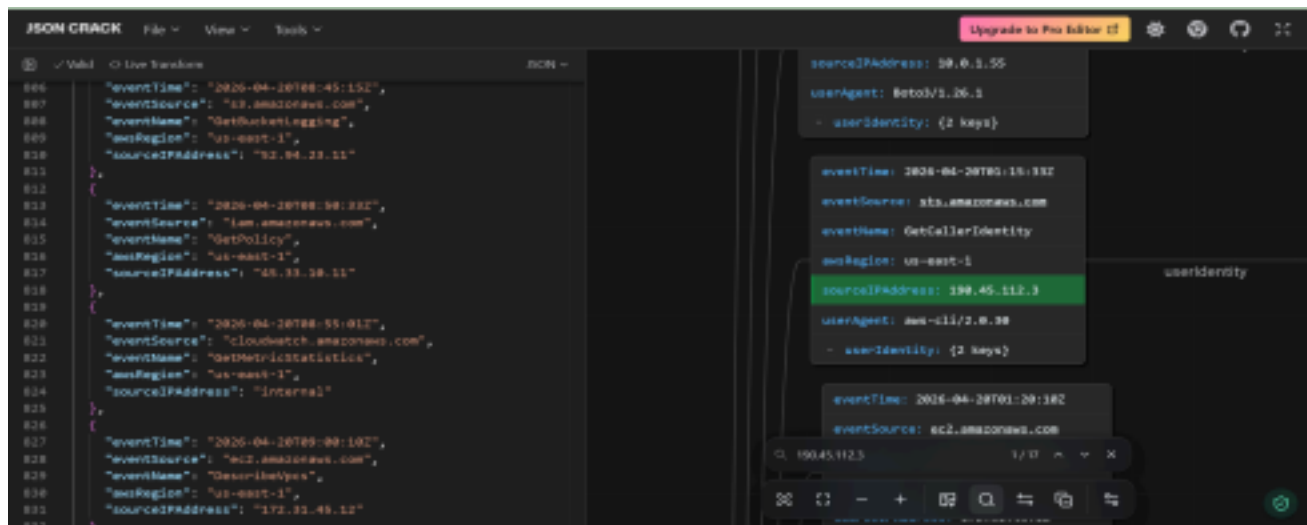

Objective: Deconstruct a highly obfuscated cloud compromise involving data exfiltration and credential theft.

Deliverables:

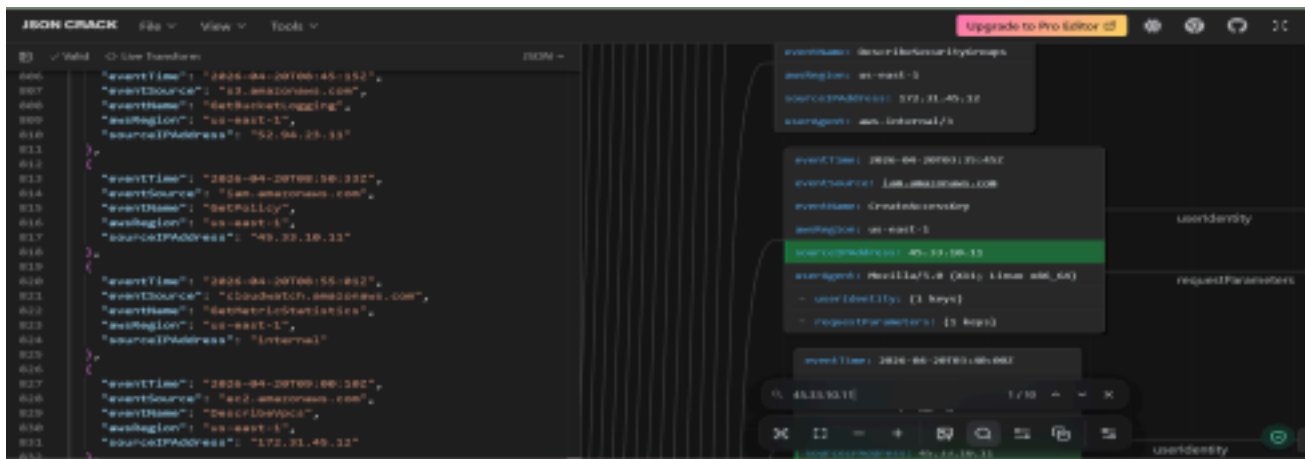

1. The access key ID that was stolen and used for the bulk attack is: **AKIA_DEV_PROD_9982**

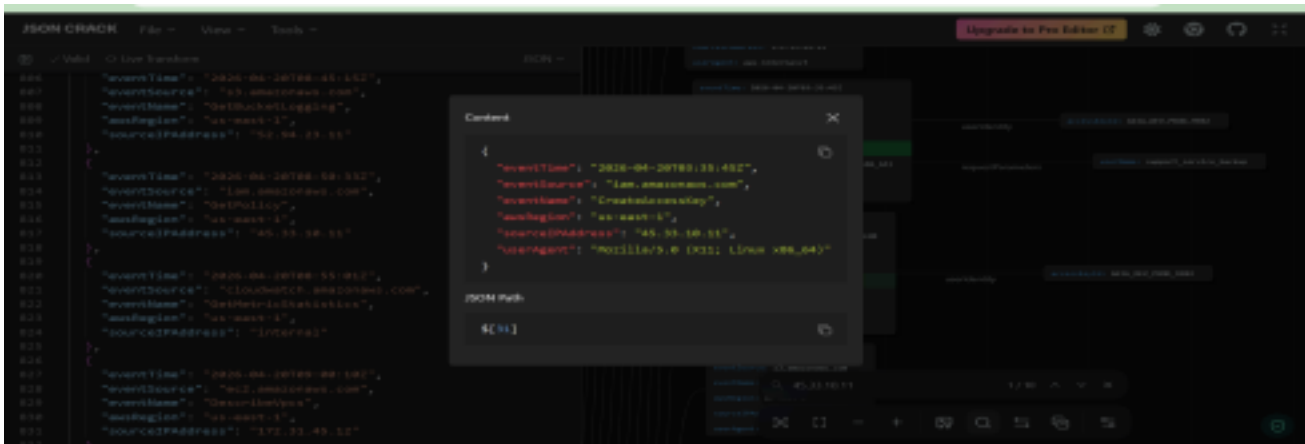

2. The Initial Attacker IP: **190.45.112.3**

- The second IP address used for persistence: **45.33.10.11**

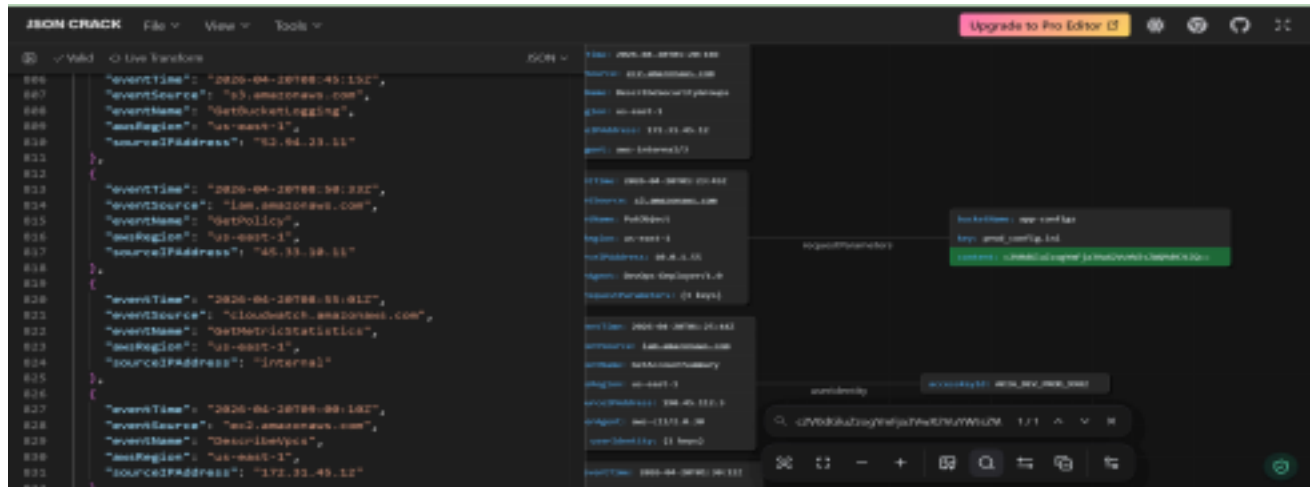

- The timestamp of the first action taken from the second IP: **2026-04-20T03:35:44Z**

3. The two distinct Base64 encoded strings in the logs are:

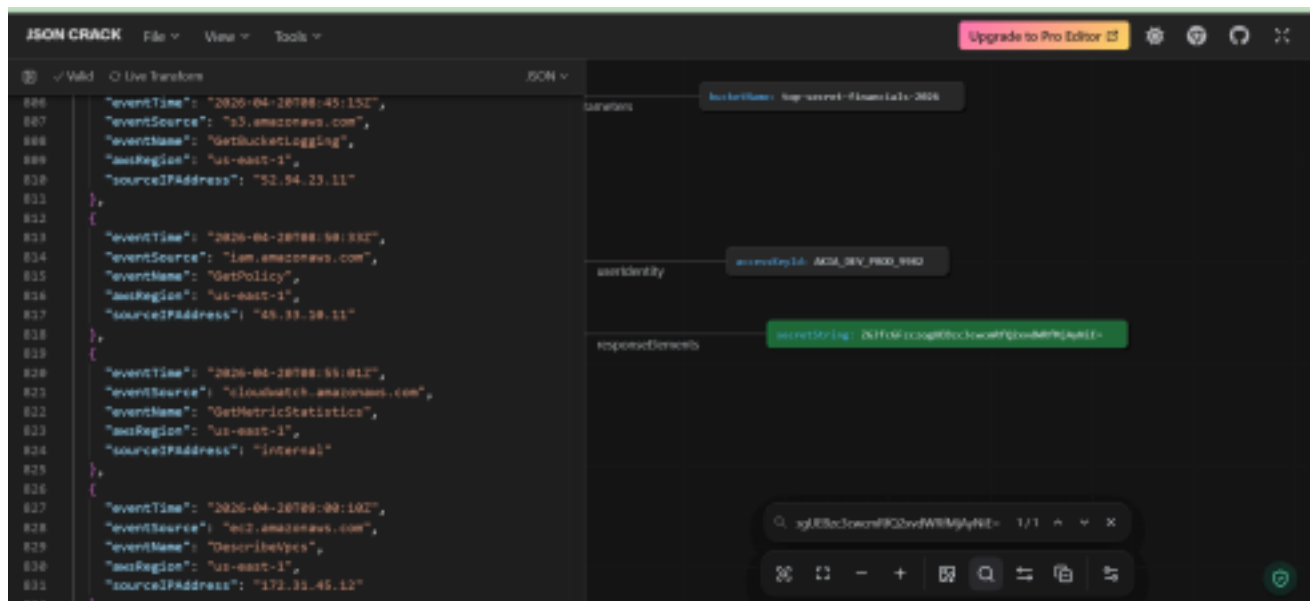

- c2V0dGluZzogYmFja3VwX2VuYWJsZWQ9dHJ1ZQ== (Legitimate)

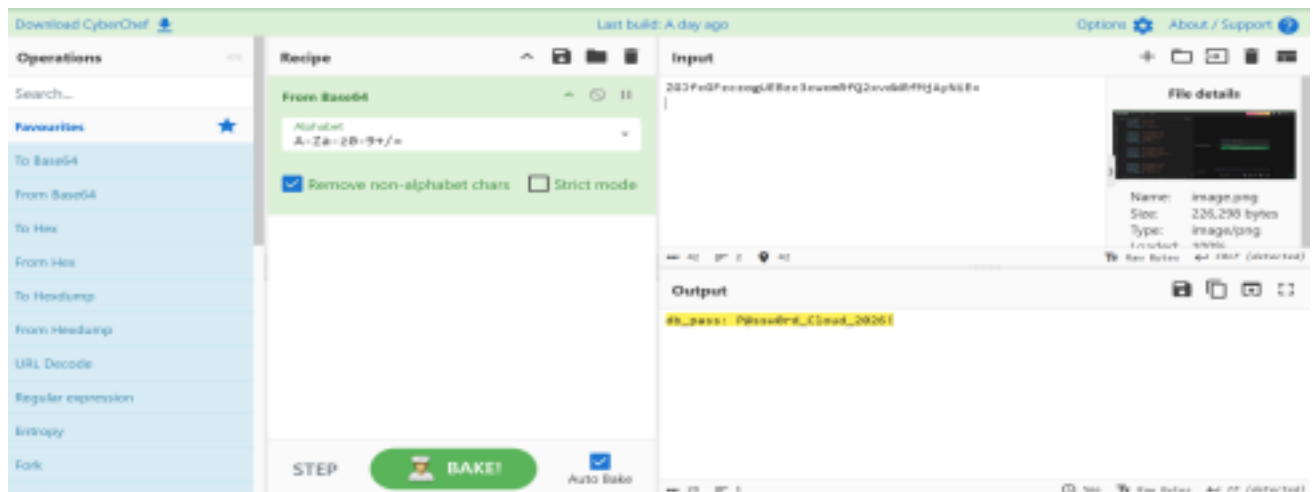

Decoded: setting: backup_enabled=true

- ZGJfcGFzczogUEBzc3cwcmRfQ2xvdWRfMjAyNiE= (Not legitimate)

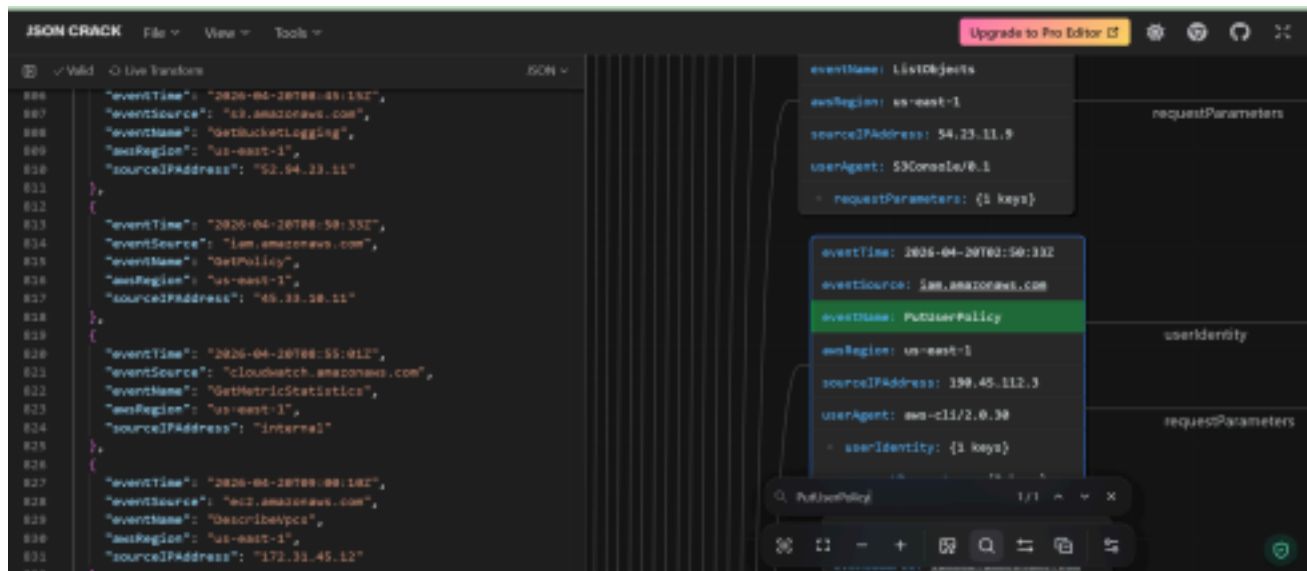

Decoded: db_pass: P@ssw0rd_Cloud_2026!

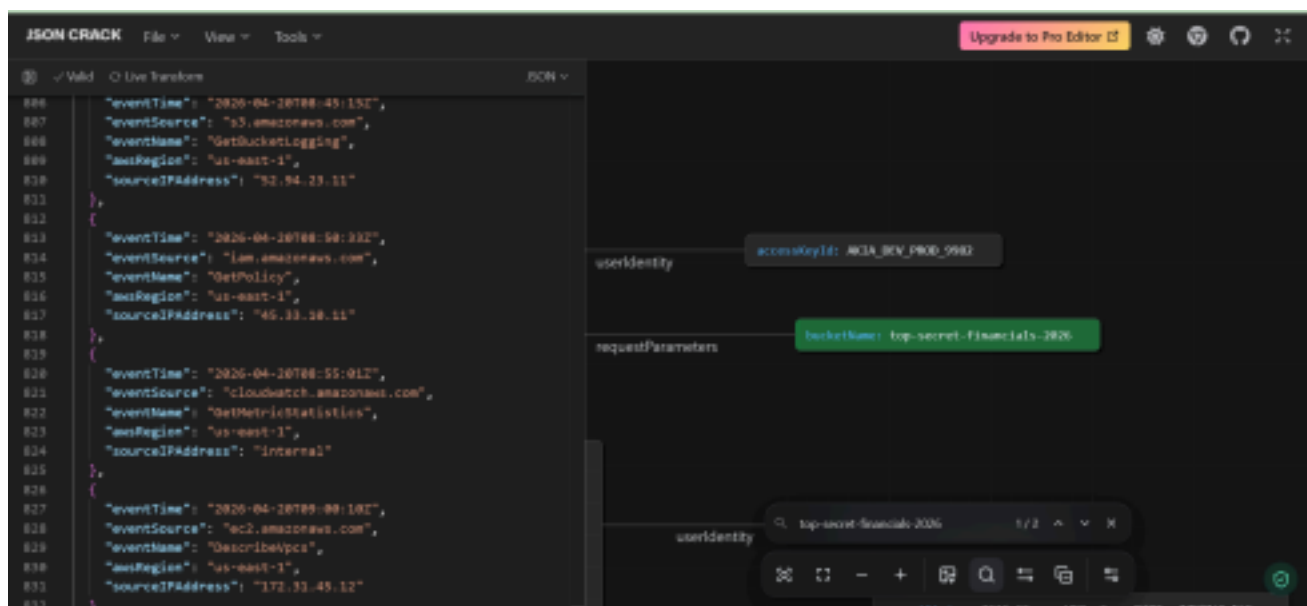

4. The specific timestamp and API call where the attacker granted themselves full administrative privileges:

- Timestamp: 2026-04-20T02:50:33Z
- API Call: PutUserPolicy

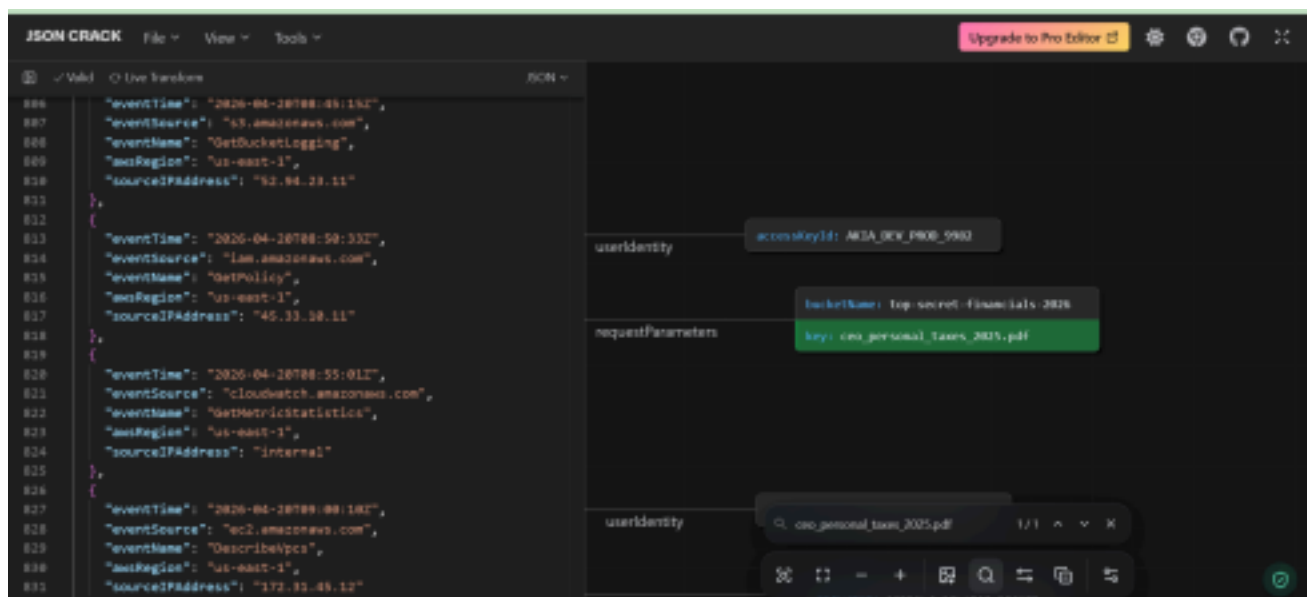

5. The specific file that was downloaded from S3:

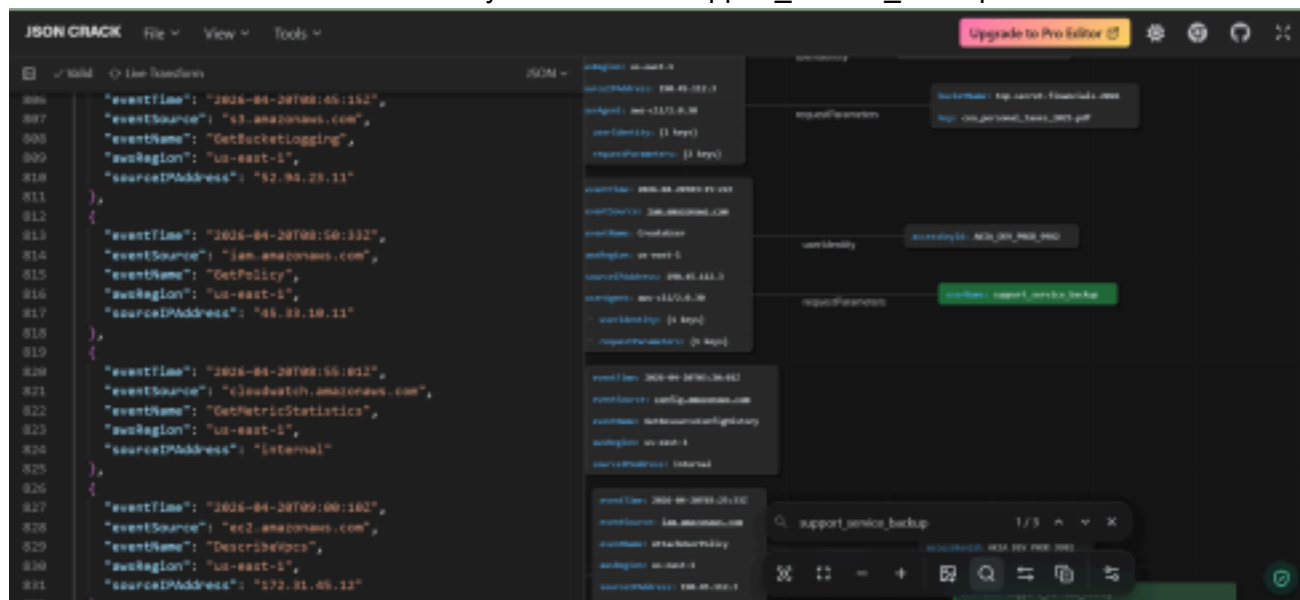

- Bucket Name: top-secret-financials-2026

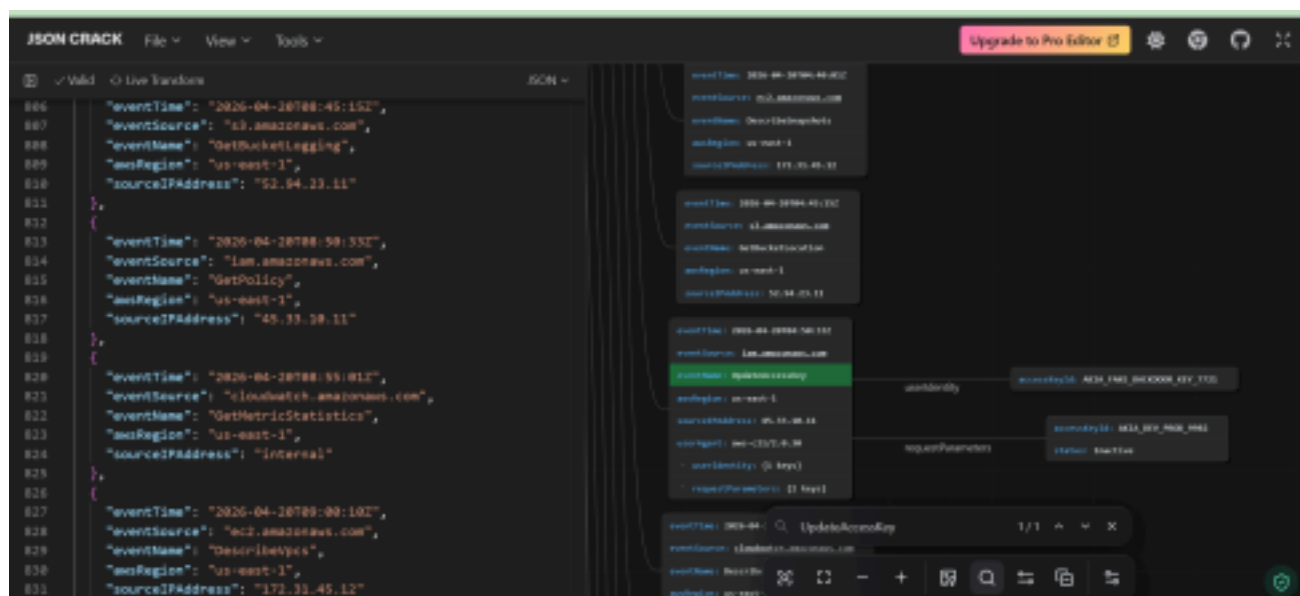

- File Name: ceo_personal_taxes_2025.pdf

6. The new Backdoor User created by the attacker: support_service_backup

- The final action the attacker took against the original stolen data:
Action: UpdateAccessKey — Status set to "Inactive"

- The attacker disabled the original compromised access key after completing their objectives
